

## Creatures That Live In Perpetual Darkness.

The outline below is based on the STEM activity 'Who would live in a house like this?'

### Task: Design a creature that would live in the boot of Mrs Rye's car!

#### Success Criteria:

You will need to include

- A clear, drawing of your creature
- Labels with explanations of the creature's key features
- Give your creature a name

#### Think about...

Where does the creature live? How might this affect its key features?

What other features might it need to survive?

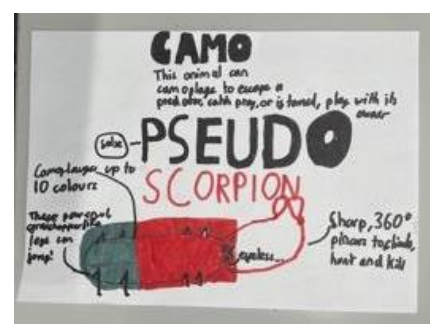

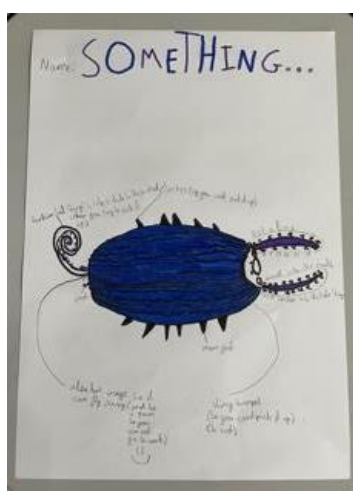

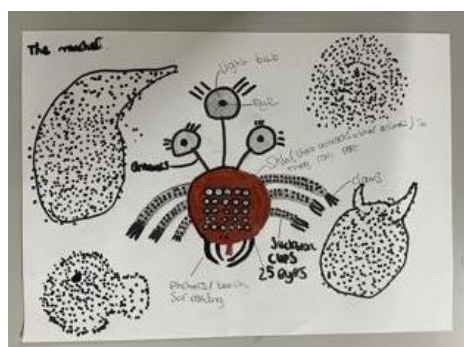

Is it a predator or prey? How would this affect its features?

You can click on these web links to find out and be inspired by some creatures in the world that live in perpetual darkness!

[These Creepy Carnivorous Worms Make Caves Look Like The Night Sky \(sciencealert.com\)](https://www.sciencealert.com/these-creepy-carnivorous-worms-make-caves-look-like-the-night-sky)

[These Beautiful Creatures Spend Their Entire Lives in Darkness \(nationalgeographic.com\)](https://www.nationalgeographic.com/animals/invertebrates/creatures-that-live-in-darkness/)

Here are some designs that Charlie, Joshua and Aiden started today!

Please dojo me if you try this activity – I'd love to see the designs you come up with!  
(Parents please can I stress this is optional NOT a requirement and you might want to keep it to hand for another time!)
