

St. George's (VC) CEP School

Science Curriculum Map 2021/22

	Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
EYFS	<p>Science in the EYFS is taught as part of 'Understanding of the World'. Children know about similarities and differences in relation to materials and living things. They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur, and talk about changes.</p> <p>They use vocabulary including seasonal language, naming of animals and their young, healthy and unhealthy, seeds, flower, vegetable, plant, grow, textures. They explore with scientific equipment such as torches, magnifying glasses, nets and magnets.</p>					
	<p style="text-align: center;">Working Scientifically Year 1 and 2</p> <ul style="list-style-type: none"> • asking simple questions and recognising that they can be answered in different ways • observing closely, using simple equipment • performing simple tests • identifying and classifying • using their observations and ideas to suggest answers to questions • gathering and recording data to help in answering questions 					
Year 1	<p>Animals inc humans</p> <ul style="list-style-type: none"> -To name some animals and identify living things. -Identify diet of some animals - carnivores, herbivores and omnivores -Separate living and non living things. - Draw and label basic parts of the human body and associate with senses 	<p>Animals inc humans</p> <ul style="list-style-type: none"> -To name some animals and identify living things. -Identify diet of some animals - carnivores, herbivores and omnivores -Separate living and non living things. - Draw and label basic parts of the human body and associate with senses. 	<p>Seasonal change</p> <ul style="list-style-type: none"> -Observe changes across the four seasons -Observe and describe weather associated with the seasons and how day length varies. -Observe and describe weather associated with the seasons and how day length varies. 	<p>Everyday materials</p> <ul style="list-style-type: none"> -Distinguish between an object and the material from which it is made. -Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock. -Describe the simple physical properties of a variety of everyday materials. -Compare and group together a variety of 	<p>Plants</p> <ul style="list-style-type: none"> -Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees. -Identify and describe the basic structure of a variety of common flowering plants, including trees. 	<p>Seasonal change</p> <ul style="list-style-type: none"> -Observe changes across the four seasons -Observe and describe weather associated with the seasons and how day length varies. -Observe and describe weather associated with the seasons and how day length varies.

				everyday materials on the basis of their simple physical properties.		
Year 2	<p>Plants</p> <p>-Observe and describe how seeds and bulbs grow into mature plants.</p> <p>-Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.</p>	<p>Use of everyday materials</p> <p>-Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses.</p> <p>-Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.</p>	<p>Animals including humans</p> <p>-Notice that animals, including humans, have offspring which grow into adults.</p> <p>-Find out about and describe the basic needs of animals, including humans, for survival</p> <p>- Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.</p>	<p>All living things and their habitats</p> <p>-Explore and compare the differences between things that are living, dead, and things that have never been alive.</p> <p>-Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other</p>	<p>All living things and their habitats</p> <p>-Identify and name a variety of plants and animals in their habitats, including micro habitats.</p> <p>-Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.</p>	<p>Exploration of Light (STEM)</p> <p>-Observe and name a variety of light sources.</p> <p>-Explore materials which allow light through and those that will not.</p> <p>-Investigate shadows, explore what may be seen in the dark and use data loggers to help find the best material to make Teddy some sunglasses.</p> <p>Children investigate different coloured filters for sunglasses for Teddy. Start by using the light sensor to record the light without a filter and with a total block (black card) before looking at the light which travels through the various colours of cellophane.</p>

Working Scientifically Year 3 and 4

- asking relevant questions and using different types of scientific enquiries to answer them
- setting up simple practical enquiries, comparative and fair tests
- making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers
- gathering, recording, classifying and presenting data in a variety of ways to help in answering questions
- recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables
- reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions
- using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions
- identifying differences, similarities or changes related to simple scientific ideas and processes

- using straightforward scientific evidence to answer questions or to support their findings.

Year 3	<p>Light</p> <ul style="list-style-type: none"> -Recognise that they need light in order to see things and that dark is the absence of light. -Notice that light is reflected from surfaces. -Recognise that light from the sun can be dangerous and that there are ways to protect their eyes. - Recognise that shadows are formed when the light from a light source is blocked by an opaque object. -Find patterns in the way that the size of shadows change. 	<p>Rocks</p> <ul style="list-style-type: none"> -Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties. -Describe in simple terms how fossils are formed when things that have lived are trapped within rock. -Recognise that soils are made from rocks and organic matter. 	<p>Forces and magnets</p> <ul style="list-style-type: none"> -Compare how things move on different surfaces. -Notice that some forces need contact between two objects, but magnetic forces can act at a distance. -Notice that some forces need contact between two objects. -Observe how magnets attract or repel each other and attract some materials and not others. -Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet and identify some magnetic materials. -Describe magnets as having two poles. -Predict whether two magnets will attract or repel each other, depending on which poles are facing. 	<p>Animals including humans</p> <ul style="list-style-type: none"> -Identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat. -Identify that humans and some other animals have skeletons and muscles for support, protection and movement. 	<p>Plants</p> <ul style="list-style-type: none"> -Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers. -Investigate the way in which water is transported within plants. 	<p>Plants</p> <ul style="list-style-type: none"> -Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. -Investigate the way in which water is transported within plants. -Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.
Year 4	<p>Sound</p> <ul style="list-style-type: none"> -Identify how sounds are made, associating some of them with 	<p>Animals including humans</p> <ul style="list-style-type: none"> -Describe the simple functions of the basic 	<p>States of matter</p> <ul style="list-style-type: none"> -Compare and group materials together, according to whether 	<p>Electricity</p> <ul style="list-style-type: none"> -Identify common appliances that run on electricity. 	<p>Electricity</p> <ul style="list-style-type: none"> -Recognise that a switch opens and closes a circuit and 	<p>All living things</p> <ul style="list-style-type: none"> -Recognise that living things can be grouped in a variety of ways.

	<p>something vibrating.</p> <p>-Recognise that vibrations from sounds travel through a medium to the ear.</p> <p>-Find patterns between the pitch of a sound and features of the object that produced it.</p> <p>-Find patterns between the volume of a sound and the strength of the vibrations that produced it.</p> <p>-Recognise that sounds get fainter as the distance from the sound source increases.</p>	<p>parts of the digestive system in humans.</p> <p>-Identify the different types of teeth in humans and their simple functions.</p> <p>-Construct and interpret a variety of food chains, identifying producers, predators and prey.</p>	<p>they are solids, liquids or gases.</p> <p>-Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)</p> <p>-Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.</p>	<p>-Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers.</p> <p>-Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery.</p>	<p>associate this with whether or not a lamp lights in a simple series circuit.</p> <p>-Recognise some common conductors and insulators, and associate metals with being good conductors.</p>	<p>-Explore and use classification keys to help group.</p> <p>-Identify and name a variety of living things in their local and wider environment.</p> <p>-Recognise that environments can change and that this can sometimes pose dangers to living things.</p>

Working Scientifically Year 5 and 6

- planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary
- taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate
- recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs
- using test results to make predictions to set up further comparative and fair tests
- reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and a degree of trust in results, in oral and written forms such as displays and other presentations
- identifying scientific evidence that has been used to support or refute ideas or arguments.

Year 5	<p>Forces</p> <p>-Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object</p> <p>-Identify the effects of</p>	<p>Forces</p> <p>-Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object</p> <p>-Identify the effects of</p>	<p>Earth and Space</p> <p>-Describe the movement of the Earth, and other planets, relative to the Sun in the solar system.</p> <p>-Describe the Sun, Earth and Moon as</p>	<p>Animals including humans</p> <p>-Describe the changes as humans develop to old age.</p>	<p>Start in term 4</p> <p>Properties and changes of materials terms</p> <p>-Compare and group together everyday materials on the basis of their properties, including their hardness, solubility,</p>	<p>All living things and their habitats</p> <p>-Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird.</p> <p>-Describe the life process of</p>
--------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>air resistance, water resistance and friction, that act between moving surfaces</p> <p>-Recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect.</p>	<p>air resistance, water resistance and friction, that act between moving surfaces</p> <p>-Recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect.</p>	<p>approximately spherical bodies.</p> <p>-Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.</p> <p>-Describe the movement of the Moon relative to the Earth.</p>		<p>transparency, conductivity (electrical and thermal), and response to magnets.</p> <p>-Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution</p> <p>-Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating</p> <p>Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic.</p> <p>-Demonstrate that dissolving, mixing and changes of state are reversible changes</p> <p>-Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible,</p>	<p>reproduction in some plants and animals.</p>
--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------

					including changes associated with burning and the action of acid on bicarbonate of soda.	
Year 6	<p>Evolution and inheritance</p> <ul style="list-style-type: none"> -Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago -Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents -Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution 	<p>Electricity</p> <ul style="list-style-type: none"> -Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit -Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches -Use recognised symbols when representing a simple circuit in a diagram 	<p>Light</p> <ul style="list-style-type: none"> -Recognise that light appears to travel in straight lines. -Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye. -Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes. -Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them. 	<p>All living things and their habitats</p> <ul style="list-style-type: none"> -Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals -Give reasons for classifying plants and animals based on specific characteristics 	<p>Animals including humans</p> <ul style="list-style-type: none"> -Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood -Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function -Describe the ways in which nutrients and water are transported within animals, including humans 	<p>Plants and trees (STEM)</p> <ul style="list-style-type: none"> -Tree rings: investigate cut tree trunks to determine the age of the tree, how fast it grew and climatic conditions during its growth. -Investigating if plants grow better with fertiliser: plan and carry out a fair test looking at the effect of fertiliser on growing radishes. -Designing a seed: To understand germination and seed dispersal.
